Art Unit: 3727

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a combination of a tank assembly comprising a vessel, cover and riser, classified in class 220, subclass 567.1.
- II. Claims 5-12, drawn to a subcombination of a cover, classified in class 220, subclass 293.
- III. Claims 13-20, drawn to a subcombination of a vessel, classified in class 220, subclass 565.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and (II and III) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination doesn't require the upper wall, lower wall, outer edge and cavity of the cover subcombination and the combination doesn't require the elongated top and bottom walls, spaced end walls, a portal sized to admit the entry of a human and a rim having a substantially frustoconically shaped upwardly and inwardly extending receiving surface of the vessel subcombination. The subcombinations have separate utility such as a cover for the open end of a pipe with no vessel or riser attached and the vessel can be used without the cover or riser of the combination such as an open vessel mounted above ground with no cover or riser.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention of the cover has separate utility such as covering the open end of a pipe with no vessel. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Thomas Van Hoozer on August 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Castellano whose telephone number is 703-308-1035. The examiner can normally be reached on M-Th 6:30-5.
